ER 2: Chart of Accounts & General Ledger

ORGANIZATION
int id PK platform.organizations
string name Tenant Name
organization_id (RESTRICT)
organization_id (RESTRICT)
FINANCE_ACCOUNT
int id PK accounts.id
int organization_id FK References platform.organizations(id)
string code account_code (e.g. 1010, 1200, 2010, 4000, 5200) UK per org
string name Account Label / Description
string account_type ASSET, LIABILITY, EQUITY, REVENUE, EXPENSE
int parent_account_id FK Self-referencing tree parent account ID
string currency Default INR
decimal opening_balance Opening balance Decimal(15,2)
date opening_date Opening balance date
decimal current_balance Live running balance Decimal(15,2)
boolean is_active Active posting toggle (default true)
boolean is_reconciled Reconciliation flag
int created_by Audit user ID
int updated_by Audit user ID
datetime created_at Created timestamp
datetime updated_at Updated timestamp
datetime deleted_at Soft-delete timestamp
parent_account_id (Hierarchical CoA Tree)
FINANCE_JOURNAL_ENTRY
int id PK journal_entries.id
int organization_id FK References platform.organizations(id)
string entry_number entry_number UK per org (JE-YYYYMMDD-XXXX)
date entry_date Posting date
string reference Voucher reference / source document
string description Journal narration
string status DRAFT, POSTED, REVERSED
decimal total_debit Sum of debit lines (asserts == total_credit)
decimal total_credit Sum of credit lines (asserts == total_debit)
int reversed_entry_id FK References original journal_entries.id (1:1 UK)
int created_by Audit user ID
int updated_by Audit user ID
datetime created_at Created timestamp
datetime updated_at Updated timestamp
reversed_entry_id (Reversal pair - 1:1 UK)
account_id (Debit/Credit lines - RESTRICT)
journal_entry_id (Voucher lines - CASCADE)
FINANCE_JOURNAL_LINE
int id PK journal_lines.id
int organization_id FK References platform.organizations(id)
int journal_entry_id FK References journal_entries.id (CASCADE)
int account_id FK References accounts.id (RESTRICT)
string entry_type DEBIT or CREDIT
decimal amount Line monetary value Decimal(15,2)
string description Line level narration
int line_order Sequential visual line index
datetime created_at Created timestamp
